BULLDOG: BOTTOM 12"

RACK REPAIR KITS

BULLDOG Repair

The Bulldog Pallet Rack Repair Kit is a dual purpose repair and high impact outrigger protector. It provides ultimate impact protection for the most vulnerable frame section, the bottom 12" of the front column. This is a high impact deflecting kit.

Laser focused, addresses the largest single category of column damage with the most effective solution. Does not require replacing undamaged factory bracing. Accommodate beam levels 20" or higher. It is not a wraparound post protector or plastic gimmick. This engineered kit becomes part of the post and prevents twisting. It is available in protruding and non-protruding versions.
