RACK REPAIR KITS

ADVANTAGE

Repair Internally Reinforced (IR)

This reinforced column pallet rack repair kit offers repair and protection against outrigger impact damage, the most common cause of frame damage. The internal deflector reinforces the corners of the column and allows for the lowest possible beam elevation. Made of the same punch style as the parent frame. Recommended for narrow aisles.

Accommodates lowest possible beam elevation. Reuses existing OEM struts, or accepts new struts when needed. The front post is reinforced with a backer channel for additional strength. Kit has a massive 3/8" thick oversized footplate with two 3/4"x 7" anchors providing high impact resistance and minimal column twisting.
